### **DETAILED ACTION**

This application filed August 1, 2003, is a continuation of 09/510,444, filed 02/21/2000, now US PAT 6,602,711.

The preliminary amendment filed August 8, 2003 has been received and entered. The specification has been amended. Claims 16-25 are pending.

#### ***Examiners' comment***

As indicated in Applicants response, the restriction requirement mailed January 5, 2005, failed to consider the preliminary amendment filed August 1, 2003 with the application.

Accordingly, the restriction requirement is vacated.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1632

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16-25 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,602,711 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because one obvious use of embryoid bodies acknowledged in the art and taught in the specification (see column 4) is for their use in studying differentiation. In this case, the instantly claimed methods and those set forth in '711 differ only in that the ES cells in the embryoid body are cultured to differentiate. The present specification provides no other uses for embryoid bodies other than for providing a product suitable for differentiation (column 3, lines 35-42).
